Synopsis: The film tells about the life of Stephen Hawking (Eddie Redmayne) from 1963, when he was in Cambridge working on his doctoral thesis, to the moment he was knighted by Queen Elizabeth II and his first marriage was about to come to an end. In 1963 he met the woman that would be his first wife, and his disease began to manifest. This process, that started very soon, didn't kill himself quickly; in fact, Stephen Hawking is still alive.

Awards: Academy Award in the category of Best Actor (Eddie Redmayne). Nominated to the Academy Awards in the categories of Best Picture, Best Actress (Felicity Jones), Best Adapted Screenplay and Best Original Score (2015).
